The Challenges of Building a Resilient Workplace

As businesses plan for workplace re-entry, safeguarding the health of employees is a number one concern. Employers must comply with local safety regulations and ensure new policies are implemented, communicated and monitored. The requirements are critical and complex:

- **Ensure employee safety:** Ensure worker well-being, identify infection risk and effectively manage workplace re-entry with the right protocols and communications.
- **Manage capacity thresholds:** Configure space usage across the real estate portfolio and enforce regulatory limits.
- **Handle unpredictable shifts:** React quickly to changes in safety needs that require true resiliency.

A Proven Way Forward

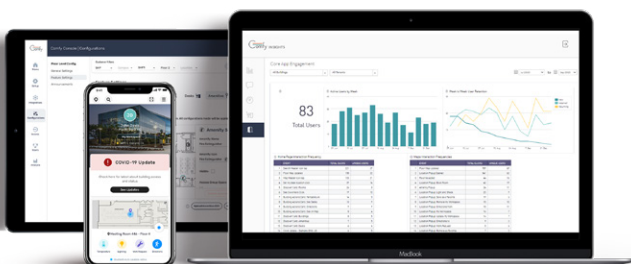

Comfy brings the technology and workflow to help businesses easily implement a secure workplace re-entry with the Safe Return solution. The solution's timely functions, open platform,

integration partners and consumer-grade mobile app enable rapid deployment while keeping your business flexible to future needs.

- **Space configuration:** Easily set capacity limits for each building, floor or workspace zone to ensure physical distancing.
- **Wellness checks:** Administer employee wellness checks prior to building entry to identify risks of COVID-19*.
- **Intuitive communication:** Help employees navigate the workplace by communicating new protocols and space availability.
- **Workspace booking:** Allow employees to book their workspace in advance.
- **Shift management:** Implement schedule optimization to better control building capacity*.
- **Valuable data analysis:** Gather crucial space utilization data to continually optimize the workplace.

“Comfy’s innovative solutions make it an ideal technology partner not only for Salesforce’s reopening, but beyond: leveraging data and insights will help us – and our customers – to create more connected, intelligent, and sustainable workplaces for the future.”

– Simon Mulcahy,
Chief Innovation Officer, Salesforce
